A messed up picture -  
Geosint 4/4

50

hard

I remember when I was traveling, I was able to visit many unique places in nature. But here I messed up my picture and I took the landscape to the left of my target. Can you identify what I was trying to photograph ? The flag is **in english** in the following form ; in lowercase and with \_ instead of spaces :  
RM{flag}

Google Lens tells us that we are at Mount Rushmore.

Here is what we could have taken as a picture not far away .

RM{mount\_rushmore}
